Download Voet D Voet Jg Biochemistry

Biochemistry, sometimes called biological chemistry, is the study of chemical processes within and relating to living organisms. Biochemical processes give rise to the complexity of life.. A sub-discipline of both biology and chemistry, biochemistry can be divided in three fields; molecular genetics, protein science and metabolism.Over the last decades of the 20th century, biochemistry has ...DnaA is a protein that activates initiation of DNA replication in bacteria. It is a replication initiation factor which promotes the unwinding of DNA at oriC. The onset of the initiation phase of DNA replication is determined by the concentration of DnaA. DnaA accumulates during growth and then triggers the initiation of replication. Replication begins with active DnaA binding to 9-mer (9-bp ...Pentózofosfátový cyklus, nebo také pentózový cyklus, je metabolická dráha, pomocí které se v bu?ce produkuje NADPH a p?tiuhlíkaté sacharidy ().Vzniklé NADPH je využíváno v anabolických d?jích (hlavn? syntéza mastných kyselin a steroidních látek), zatímco pentózy mohou dát vzniknout ribóze, která je d?ležitá pro syntézu RNA i DNA.? ?? ???? ???? ???? ???? ???? ?? ???? ???? ??(??
