Active Roles is a single, unified and rich tool to automate the most troublesome user and group management tasks. Administrators struggle to keep up with requests to create, change or remove access in today's hybrid AD environments and with the limited capabilities of Microsoft Active Directory (AD) and Azure Active Directory (AAD) native tools. This article provides guidance and best practices for implementing Active Directory Recycle Bin in environments where domain controllers are running Windows Server 2012 or later. "The solutions and answers provided on Experts Exchange have been extremely helpful to me over the last few years. I wear a lot of hats - Developer, Database Administrator, Help Desk, etc., so I know a lot of things but not a lot about one thing."
