

Download Fiberoptic Endoscopy And The Difficult Airway

Fiberoptic intubation (FOI) is an effective technique for establishing airway access in patients with both anticipated and unanticipated difficult airways. First described in the late 1960s, this approach can facilitate airway management in a variety of clinical scenarios given proper patient preparation and technique. This paper seeks to review the pertinent technology, clinical techniques ...Airway Management Overview. Airway management involves an array of special challenges. For difficult tracheal intubations and anesthetic bronchoscopy, KARL STORZ has..This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Schumacher Clinical Partners (SCP) and Airway Management Education Center. My doctor has said he did a bronchoscopy for a difficult airway during a cholecystectomy is the 31622 the correct code to bill? Thank you for your hel
