

Download Grants For Medical Research

The following grant funding recommendations for medical marijuana research were made by the Medical Marijuana Scientific Advisory Council and approved by the Board of Health Feb. 18, 2015. Fertility research shows low-cost, effective method to increase pregnancy rates Prof Cindy Farquhar's research, The IntraUterine Insemination (TUI) Study, shows that this low-cost treatment effectively increases pregnancy rates three-fold, and concludes that intrauterine insemination with ovarian stimulation should be offered to women with unexplained infertility as a first line treatment. At Biogen, we continuously engage with investigators in an effort to maintain our scientific leadership in a number of therapeutic areas. Below are established areas of research interest for our marketed products and related diseases. Grant Programs For over a decade, the Amyloidosis Foundation grant program has supported outstanding research in all forms of systemic amyloidosis.
