

Download Handbook Of Theories Of Aging Third Edition

This state-of-the-art handbook will keep researchers and practitioners in gerontology abreast of the newest theories and models of aging. With virtually all new contributors and content, this edition contains 35 chapters by the most highly respected luminaries in the field. This state-of-the-art handbook will keep researchers and practitioners in gerontology abreast of the newest theories and models of aging. With virtually all new contributors and content, this edition contains 35 chapters by the most highly respected luminaries in the field. These are some of the questions that have propelled this third edition of the Handbook of Theories of Aging. The need for theory-based knowledge to address problems of aging has never been greater. Yet, the ready availability of Big Data has proliferated primarily descriptive and nontheoretical research reports.

CHAPTER 1. Theories of Aging: Developments Within and Across Disciplinary Boundaries. Vern L. Bengtson and Richard A. Settersten, Jr. This is the fourth handbook that is focused on theory development within aging; the first was published almost three decades ago (Birren & Bengtson, 1988).
