

# Download Management Topics In Surgery Non Technical Skills For Surgical Trainees

In addition to technical expertise, surgical competence requires effective non-technical skills to ensure patient safety and maintenance of standards. Recently the Royal Australasian College of Surgeons implemented a new Surgical Education and Training (SET) curriculum that incorporated non-technical skills considered essential for a competent surgeon.

**BACKGROUND:** In addition to technical expertise, surgical competence requires effective non-technical skills to ensure patient safety and maintenance of standards. Recently the Royal Australasian College of Surgeons implemented a new Surgical Education and Training (SET) curriculum that incorporated non-technical skills considered essential for a competent surgeon.

**Non-Technical Skills for Surgeons (NOTSS)** This is a one-day course for consultant surgeons and post-CCT trainees from all surgical specialties. The course examines the non-technical skills which underpin good operative performance using short talks, video simulated scenarios, an audience response voting system, and small group discussions.
