

# Download Mercury Support User Guide

Mercury Network is a vendor management platform (VMP) that lets you connect with your clients by accepting orders, setting status, and delivering the final product - all in one simple interface. Ford Module Programming User's Guide 1 1. Glossary 1.1. Terms NOTE: Many of the terms in the Ford Module Programming application are written in blue text and underlined. A single left mouse click on these terms will provide a definition at the bottom of the page. LoadRunner is a software testing tool from Micro Focus. It is used to test applications, measuring system behaviour and performance under load. LoadRunner can simulate thousands of users concurrently using application software, recording and later analyzing the performance of key components of the application. Mercury was developed by Edsel Ford in 1938, making its debut as a brand in 1939 positioned to bridge the gap between Ford and its prestige make, Lincoln.
