It includes brief summaries of major findings drawn from medical and psychology journal articles, books, and related materials, divided into major categories of relevant injuries. Voluntary childlessness, also described by some as being childfree, is the voluntary choice to not have children. In most societies and for most of human history choosing not to have children was both difficult and undesirable. The availability of reliable contraception along with support provided in old age by systems other than traditional familial ones has made childlessness an option for ...
