Update on the Diagnosis and Management of Popliteal Aneurysm and Literature Review

Background. People with dysphagia have difficulty swallowing and may also experience pain while swallowing. Some people may be completely unable to swallow or may have trouble swallowing liquids, foods, or saliva. The only controlled study (Corley, 2002) of the Stretta procedure has been published in abstract form only, and has failed to confirm that the results of uncontrolled studies regarding significant reductions in acid exposure and symptom relief.
