Expires: 06/30/19 Details: Get 20% off Daviss Comprehensive Handbook of Laboratory and Diagnostic Tests With Nursing Implications, a nursing-focused and easy-to-read, this handbook delivers all of the information you need to understand how tests work, interpret their results, and provide quality patient care—pre-test, intra-test, and post-test. What is being tested? A blood smear is a drop of blood spread thinly onto a glass slide that is then treated with a special stain and the blood cells on the slide are examined and evaluated. How is it used? West Nile virus (WNV) testing is used to help determine whether a person with signs and symptoms and a history of recent exposure has an acute WNV infection. West Nile virus (WNV) is an infection that is transmitted to humans primarily by mosquitoes that have bitten infected birds or other infected humans. Testing detects either the West Nile virus directly or antibodies produced in response to WNV infection in blood and/or cerebrospinal fluid (CSF).. West Nile virus is a member of the Flavivirus family, which includes viruses such as Zika, Yellow ...
