Iohexol, sold under the trade name Omnipaque among others, is a contrast agent used during X-rays. This includes when visualizing arteries, veins, ventricles of the brain, the urinary system, and joints, as well as during computer tomography (CT scan). It is given by mouth, injection into a vein, or into a body cavity. Side effects include vomiting, skin flushing, headache, itchiness, kidney ...Barium sulfate suspension, often simply called barium, is a contrast agent used during X-rays. Specifically it is used to improve visualization of the gastrointestinal tract (esophagus, stomach, intestines) on plain X-ray or computed tomography. It is taken by mouth or used rectally.. Side effects include constipation, diarrhea, appendicitis, and if inhaled inflammation of the lungs.
