Trigonometric Values A trigonometric identity is an equation involving trigonometric functions that is true for
all values for which every expression in the equation is defined. 13-1 Study Guide and Intervention (continued)
Trigonometric Identities Simplify Expressions The simplified form of a trigonometric expression is written as a
numerical value or in terms of a single trigonometric function, if possible. Any of the trigonometric identities
can be used to simplify expressions containing trigonometric functions. 74-3 Study Guide and Intervention
PERIOD Trigonometric Functions on the Unit Circle Trigonometric Functions Of Any Angle The definitions of
the six trigonometric functions may be extended to include any angle as shown below. Let θ be any angle in
standard position and point $P(x, y)$ be a point on the terminal side of θ . Verify a Trigonometric Identity The left-
hand side of this identity is more complicated, so transform that expression into the one on the right 5-1 study
