

Download Windows 7 Updates Manually

How to Manually Check for Windows 7 Updates Open the Windows Control Panel, and then click System and Security. Click Windows Update. In the left pane, click Check for Updates. Click the link for any updates that you wish to install. Select the updates that you want to install and click OK. ...If you're not sure whether you have Windows 7 Service Pack 1 installed, open the Start menu, type "winver" into the search box, and press Enter. If it says "Service Pack 1" in the window, you have Service Pack 1. If it doesn't, you need to install Service Pack 1. Start installing Windows updates manually. After downloading the AutoPatcher for Windows 7 go back to the main folder of AutoPatcher that is called apup if you did not change it. Inside the folder you will then find the file autopatcher.exe, run it. Next, you can select the updates that you want to install.
